

Intern Java-/Database Development (m/f) – 2020926 (Dornstadt)

About us

Healthcare IT, a business unit of GE Healthcare, provides comprehensive clinical information systems under the brand mark "Centricity". These solutions enable our clients to access critical patient records everywhere in a hospital's network. RIS/PACS is an integrated solution for image and data management in Radiology. High Acuity solutions are focused on the needs of critical care departments and CVIS is supporting faster cardio vascular examination workflows.

Responsibilities

Further development of our web-based database application "SPIRIT" (Sales & Services Productivity and Information Repository for Healthcare IT). "SPIRIT" is used for project administration and management, time tracking, assignments and margin analysis, sales planning and quotation.

Specifically, we are looking into this international project reinforcement for the following topics:

- Establishment of an order repository, which is powered by a new interface with data
- Data migration and conversion of existing functionalities to the new order repository
- Setup of a new "project cockpit" (one-stop-shop) for IT Professional Service Project Managers
- Design and development of features to automate existing and new business processes (e.g. Capacity Planning, Backlog Analysis etc.)

Qualifications

- Student (m/f) in the field of computer science, business, industrial engineering, technical computer science or equivalent field
- Good knowledge of SQL/Oracle, Java, JSP
- Interested in the implementation of sophisticated solutions in a team with other students
- Commitment to work independently, logical and structured thinking
- Interest for project management and controlling/Operations
- German (fluent written and spoken)
- Good knowledge of English

We look forward to receiving your [online application](#) with reference to job number 2020926!
