

JR. DEVELOPER MACHINE LEARNING (m/f)

GRADUATE POSITION – PARTTIME OR FULLTIME

At Aaron.ai, we believe that voice offers the most natural way to interact with technology. If you are excited to work with machine learning and NLP, join our fast-growing startup in Berlin!

Aaron.ai automates voice-based interactions between companies, customers and employees powered by artificial intelligence. We are looking for graduates who are passionate about creating cutting edge voice technology. As a part-time or fulltime employee, you will work closely with the founders and take responsibility from day 1.

WHAT WE OFFER

- Scrum-based teamwork and modern technology stack
- Coaching by experienced CTO and young, international team
- State-of-the-art research input from cooperation with university
- Spacious Office in Berlin-Kreuzberg and frequent team events

WHAT YOU HAVE

- Study background & practical experience in machine learning
- Knowledge about natural language processing concepts
- Solid python skills
- Ideally, experience with Git, Linux, Docker and node.js
- Interest in voice automation and deep learning

YOUR TASKS AHEAD

- Co-development and maintenance of AI- and interaction modules
- Design and implementation of reinforcement based features
