

Become an Intern With Deutsche Telekom in Bonn!

Deutsche Telekom International Carrier Sales & Solutions (ICSS) offers a product management internship in Bonn.

Content/Tasks

You are supporting a product management team in further developing roaming, clearing and messaging solutions for ICSS customers (mobile operators, broadband ISP's and content providers) on all five continents. You assist the team in daily recurring tasks (implementation monitoring, status reporting to customers), in developing sales tools and presentations but you may also be responsible for assigned projects (strategy, product development, business cases).

Working in a product management environment you will be interfaced with different entities within Deutsche Telekom as well as with customers worldwide.

The product management team is based on three different sites (Paris, Bonn, Budapest). "Virtual" cooperation is therefore necessary. The working language is English, though back-office tasks are interfaced with a German environment. Hence German is also your daily communication language.

The team is young and relatively small and has a hand-on, almost "start-up"-like spirit even though working within Deutsche Telekom requires strong skills in corporate and networking thinking.

Ideal Profile

- Strong interest in IT & telecommunications technologies and the corresponding markets
- Entrepreneur type
- Excellent analytical skills
- Customer-oriented
- Excellent communication skills
- Excellent knowledge of Microsoft Office
- Language skills: English, German - fluent

Time of employment

- Duration: ≥ 6 month
- Preferred start date: 16.07.2007

Compensation

- We offer attractive compensation
