FULL STACK NODE DEVELOPER (m/f/x)

FULLTIME / PARTTIME

Excited to connect the dots in a fast-paced AI startup in Berlin? Then help us to bring our JavaScript development and integration processes to the next level!

Aaron.ai is building an artificial intelligence to automate voice-based interactions between companies, customers and employees. We are looking for a junior developer with a study and/or practical background in JavaScript, who is excited about designing and implementing cutting edge voice automation technology and webapps for clients such as Deutsche Bahn, Daimler, BVG and E.ON.

WHAT YOU'LL BE DOING

- Design, co-development & maintenance of node.js applications and frontends

- Implementing & maintaining incoming and outgoing connections with various internal and external APIs

WHAT YOU BRING ALONG

- 1-2 years of practical experience with JavaScript (fulltime, working student jobs, and/or internships)
- Experience with frontend frameworks like React

- Ideally, experience with Python
- Interest in learning about and working with machine learning & VoIP telephony

WHAT WE OFFER

- Scrum-based teamwork and modern technology stack
- Fair compensation & virtual shares in the company

- Coaching by experienced management team and international colleagues
- Spacious Office near Potsdamer Platz and frequent team events
