

Sapient Global Market are looking for skilled thinkers and smart problem solvers who want to make an impact in the financial services industry, within our clients' organizations and on their future.

Associate, Technology

Sapient Global Markets provides an unmatched breadth of technology, advisory, analytics, program management and operations services to help leading firms in the capital and commodity markets address today's most complex challenges in the areas of trading and risk management. We offer a comprehensive campus hire training program that provides you with the knowledge and skills needed for a successful career. At Sapient, you will work in a globally distributed team, alongside leading experts in their fields—and enjoy limitless opportunities for professional and personal growth.

As an Associate in Technology, you will be working with a talented and passionate team to design and develop innovative bespoke software solutions for our clients using cutting edge languages and methodologies.

- Organize and support client workshops and meetings
- Business and strategy analysis and development with a technical focus
- Project management support with regards to project planning and coordination of scope, risk, quality, budget and goal achievement
- Project reporting and reviewing
- Project team support including events and collaboration activities
- Software solution development and prototyping
- Processes compliance management and documentation management
- Quality assurance and delivery excellence management
- Unique opportunity to travel to India for a 2 to 3 month training and orientation program accompanied with other campus hires across Europe and North America

What we are looking for:

- At least a 2.1 degree (or equivalent) in a subject such as Computer Science, Engineering, or another technology focused discipline preferred
- Interest in technology that has led you to gain exposure in programming languages such as C++, SQL, Java, Visual Basic or .NET, and operating systems such as Unix
- Keen interest in business and technology and a desire to work with clients to solve their business problems through technical solutions
- Project work experience in a team-based environment a plus
- Self-starter, flexible and adaptable to change, goal and solution oriented
- Customer focused and excellent client-facing capabilities
- Strong written and verbal communication skills
- Openness to travel and work on client site
- Available to start January 2013 or July 2013
- Legally authorized to work in the UK
