IPC — BUSINESS MEETS EDUCATION

San Mateo Office, Engineering / Prototyping

Auslandspraktikum

General Description:
Are you up-to-date with the latest Internet services, but missing a sexy feature while having tons of ideas? Are you a beta tester of new applications and early adopter of gadgets, and already thought about most of them years ago? Friends and Family always ask you about the coolest technologies? Consider an Internship with the Americas Region West Coast office of a leading international technology consulting company. You will assist with the engineering consulting operations including prototype programming, technical research and development, business proposal preparation, and active participation in client consulting projects.
This position requires a self-motivated individual who is able to perform multiple tasks and duties as assigned in a commercial professional engineering consulting environment.

Duties and Responsibilities
- Task-oriented programming, telecommunications and IT research and development under guidance
- Participation in client-based consulting projects under guidance
- Assisting with the production of technical documentation under guidance
- Other duties and tasks as assigned

Essential Requirements
- Eligibility to work for a US-based employer in the USA
- Understanding of common telecommunications and IT technologies used in North America
- Proficiency with Windows/Intel based computers and applications
- Excellent written and oral communication skills (English)
- Ability to formulate and present technical information in a clear and concise manner
- Ability to perform under limited supervision and to fulfill assigned task objectives and manage deadlines
- Current enrollment as an undergraduate or postgraduate with emphasis or major in Computer Science, Information Technology or equivalent
- Ability to work in a multicultural and international environment
- Verifiable references from current/previous supervisors, managers, professors

Highly Desirable Requirements (Not Essential)
- Understanding of common networks, services and management systems
- Understanding of common media technologies, web services and customer care processes
- Programming skills in Visual Studio, Java, HTML, Web design

Candidate should be interested in:
RFID technologies, web design and development, streaming media applications, telecommunications networks, biometrics, Next Generation Internet Applications

Company:	Technology consulting
Location:	San Mateo, CA, USA
Period:	6 months, as soon as possible (July)
Allowance:	$ 750 (US-Dollar)
